Why use Manage My Health?

Health organisations can reduce delays and enhance continuity of care with access to medical records, allergies, prescriptions and share info with other healthcare providers all in one place at any time.

After hours and emergency care
Easy access to patient information means you can provide better care after hours and in emergencies

Reduce delays
Immediate access to patient information reduces delays and time to diagnose. Your clinicians will spend less time gathering patient information.

Secure communication
Safe, secure sharing of information enhances patient safety and care.

Fewer errors
Because everything is available online, there's less room for medication errors

No need to call GPs
You won't need to contact GPs outside of normal clinic hours for patient information

Integrated with Medtech PMS
ManageMyHealth seamlessly integrates with Medtech PMS

Equity, inclusion & security

Manage My Health is a patient-centric platform that puts your patients' needs first. Trusted by over 1.5 million Kiwis and used by most health centres, it is a secure health portal that empowers people to take charge of their health, and extends the capabilities of health practices to let them focus on what's more important – patient care.

Zero rated data
The Ministry of Health Sponsored Data Programme provides access to our services on smartphone or tablet at any time and without being charged for data costs

Safe, secure technology
Just like internet banking, we use SSL security technology to keep all important data safe and secure

Accessibility
Manage My Health strives to adhere to web accessibility standards to ensure our solutions are accessible to all New Zealanders, and has been working hard to deliver our solutions in multiple languages including Te Reo Māori (which is now available), Samoan, Tongan, and other mainstream languages

Te Whatu Ora/Health NZ
We are working with Te Whatu Ora/Health NZ to integrate Manage My Health with My Health Account for patient identity verification and smoother onboarding of new patients
