

Online payments

Reducing admin costs and increase cashflow

Time is money. Let's save you some!

Experience a seamless and easy way to collect payments from your patients while reducing admin costs and increasing cashflow.

Simplified to improve your cash flow

Intuitive, safe & secure

Automatically credits patient's account in PMS

Reduce bad debt

Seamless and easy way to collect payments while reducing admin costs and increasing cashflow

Did you know, on an average there are 23 steps from the time a patient requests a repeat prescription to reconciling the payment in your PMS. But, do you always get paid for your staff's time when a request is approved or declined?

With the Manage My Health Online Payments, your patients can directly pay upfront for any of your services like repeat prescriptions and appointments whether that be face-to-face, phone appointments or video consultations.

Save time

Automatically credits the patients account in the PMS, while simultaneously sending the prescription request via same workflow. Reduce the hassle of time chasing up bad debtors.

Simple and convenient for patients

Provide your patients the same payment convenience of online shopping for your medical services. It offers the same familiar prescription workflow your patients are use to with a secure payment option at the end.

Reduce bad debt

Receive payment before your practice gets involved and establish your service workflows to include payment at the time a service is requested! Enhance your practice cashflow and reduce bad debt accumulating with Online Payments.

Safe and Secure

Paying online is safe and secure, all transactions happen within our encrypted portal. Avoid unsecure phone payments and suspicious texts asking for payment and provide your patients ease of mind when paying for medical services online.

Key benefits

Seamless

Service requests and payments happen together

Convenient

No need for follow up calls or texts for payments

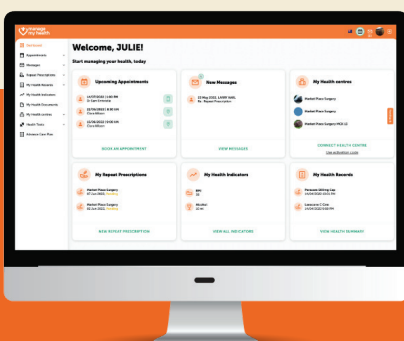

Reduce practice's admin time and bad debt

Less unpaid accounts, less follow ups
